Kharar, Punjab

SUMMARY

Recent Computer Science graduate specializing in Information Security, with hands-on cybersecurity project experience and strong knowledge of security concepts, seeking a Junior Cybersecurity Analyst role to contribute analytical and problem-solving skills in protecting digital systems.

PROJECTS

Sentinel AI – Enterprise Insider Threat Detection Platform

- Developed a live insider threat detection platform using Python, FastAPI, and Machine Learning to monitor suspicious user activities in enterprise environments.
- Achieved 92–95% threat detection accuracy using behavioral analytics and anomaly detection techniques.
- Implemented real-time alert triage, forensic audit logging, and threat monitoring mapped to the MITRE ATT&CK framework.
- Reduced false positive alerts by approximately 20% through user behavior baseline modeling.
- Built and deployed the platform as an open-source cybersecurity project on GitHub.

ML-Based Encrypted Traffic Threat Detection System

- Built a machine learning-based system to detect cyber threats in encrypted TLS network traffic without decrypting packets.
- Trained ML models to identify DDoS attacks, port scanning, and Command & Control (C2) communication with 92–95% accuracy.
- Analyzed large-scale PCAP datasets using network traffic analysis techniques and security monitoring workflows.
- Mapped detected attack patterns to MITRE ATT&CK techniques for SOC reporting and threat intelligence analysis.
- Reduced SOC analyst alert fatigue by nearly 20% using behavioral anomaly detection.

Dynamic 5G Network Slicing Security Analysis

- Simulated 3GPP-based 5G network slices including eMBB, URLLC, and mMTC using Kali Linux and VMware.
- Identified security vulnerabilities such as resource exhaustion, impersonation attacks, and slice hijacking.
- Performed security analysis and forensic investigation following the NIST Incident Response Framework.
- Proposed mitigation strategies aligned with 5G and 3GPP security standards.
- Conducted research on emerging 5G network security risks and threat modeling techniques.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CHANDIGARH UNIVERSITY

08/2022 - 06/2026 Mohali, Punjab

- Specialization in Information Security

CGPA
7.3 / 10

STRENGTHS

- Threat Analysis**
Strong knowledge of cyber threats, vulnerability assessment, and security monitoring.
- Problem Solving**
Skilled in solving security challenges using Python, Machine Learning, and cybersecurity tools.

SKILLS

SIEM Tools	Linux	Python
Cybersecurity	Network Security	
Information Security		Threat Detection
Incident Response		
Vulnerability Assessment		
Penetration Testing	SIEM	Wireshark
Nmap	Kali Linux	Machine Learning
Threat Intelligence		FastAPI Flask
VMware	GitHub	Risk Assessment

CERTIFICATIONS

Security Intelligence Engineer

IBM

Cloud Security

IBM

Google Cybersecurity

Coursera

Cybersecurity Operations Fundamentals
(CyberOps Associate)

CISCO

Cyber Threat & Incident Response Job
Simulation

Deloitte Australia (Forage)

KEY ACHIEVEMENTS

- Hackathon Finalist**
Selected for Day 2 Prototype Development at Hackathon Stack Sprint 1.0, advancing to finals among **200+ participants**.
- TryHackMe Learning**
Completed **20+ TryHackMe rooms** including SOC Level 1 and DFIR paths, building offensive and defensive security skills.
- Threat Intelligence Research**
Researched and mapped publicly disclosed to **MITRE ATT&CK techniques** for threat analysis and security learning.
- Cybersecurity Community Engagement**
Engineered security systems that prevented data breaches, saving approximately \$500,000 in potential losses.
